

## Health Worker Density Across the Tonga Region

The following visualizations display health workers across the Tonga regions (2010 - 2021). This data is taken from Pacific Data's database and compared to density measurements across the Western Pacific in 2022, as recorded by the World Health Organization (WHO).

### Total Health Workers across Tonga Regions

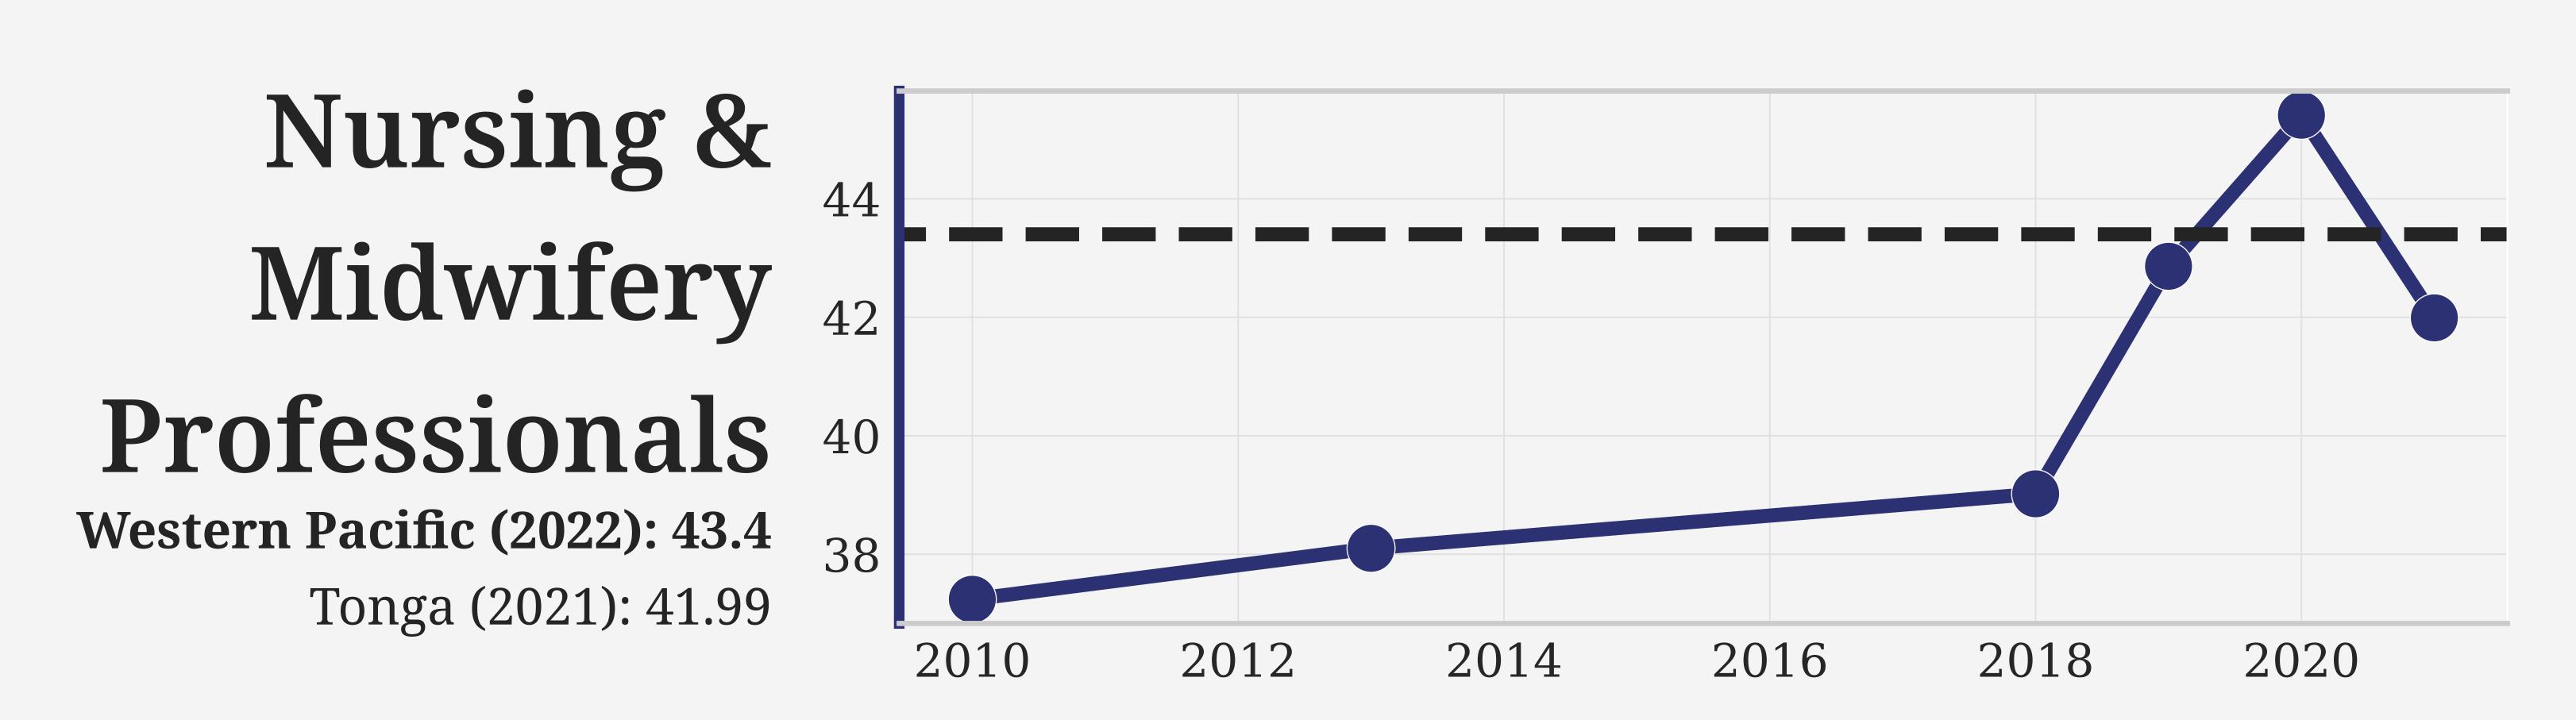

Islands are enlarged and ordered by total health workers. "Dentists" are grouped in "Other Health Staff" The following are totals taken from 2021. As one might expect, the largest concentration of Health Workers is within Tongatapu, the main island and site of the capital of Tonga.

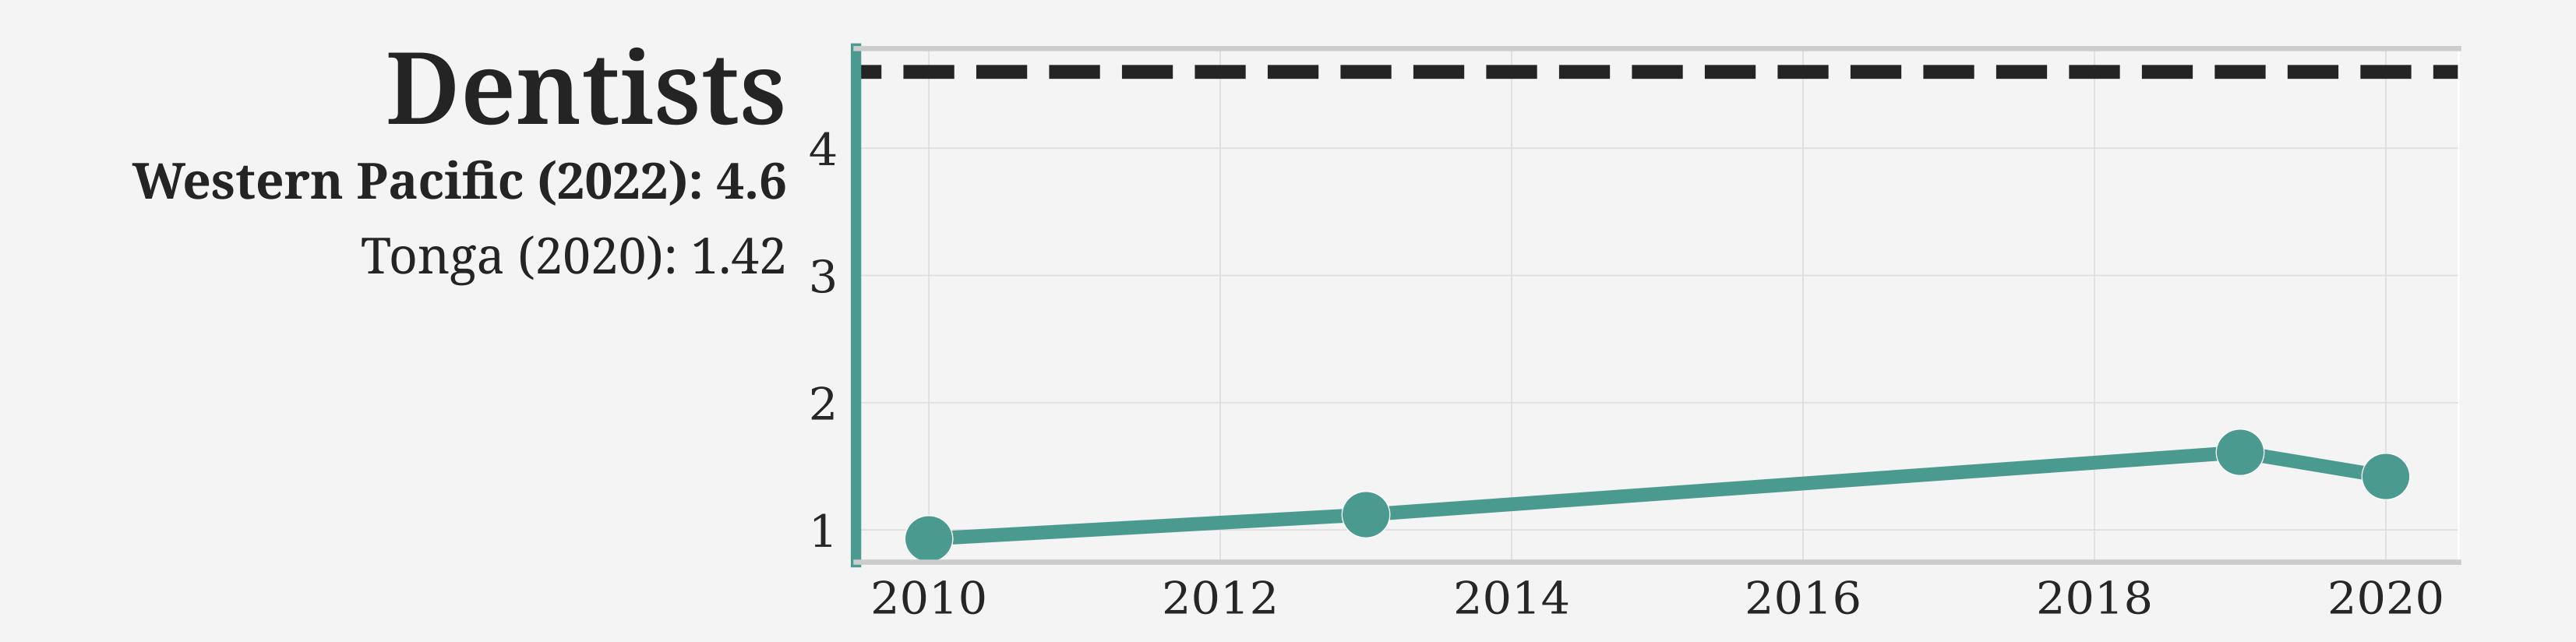

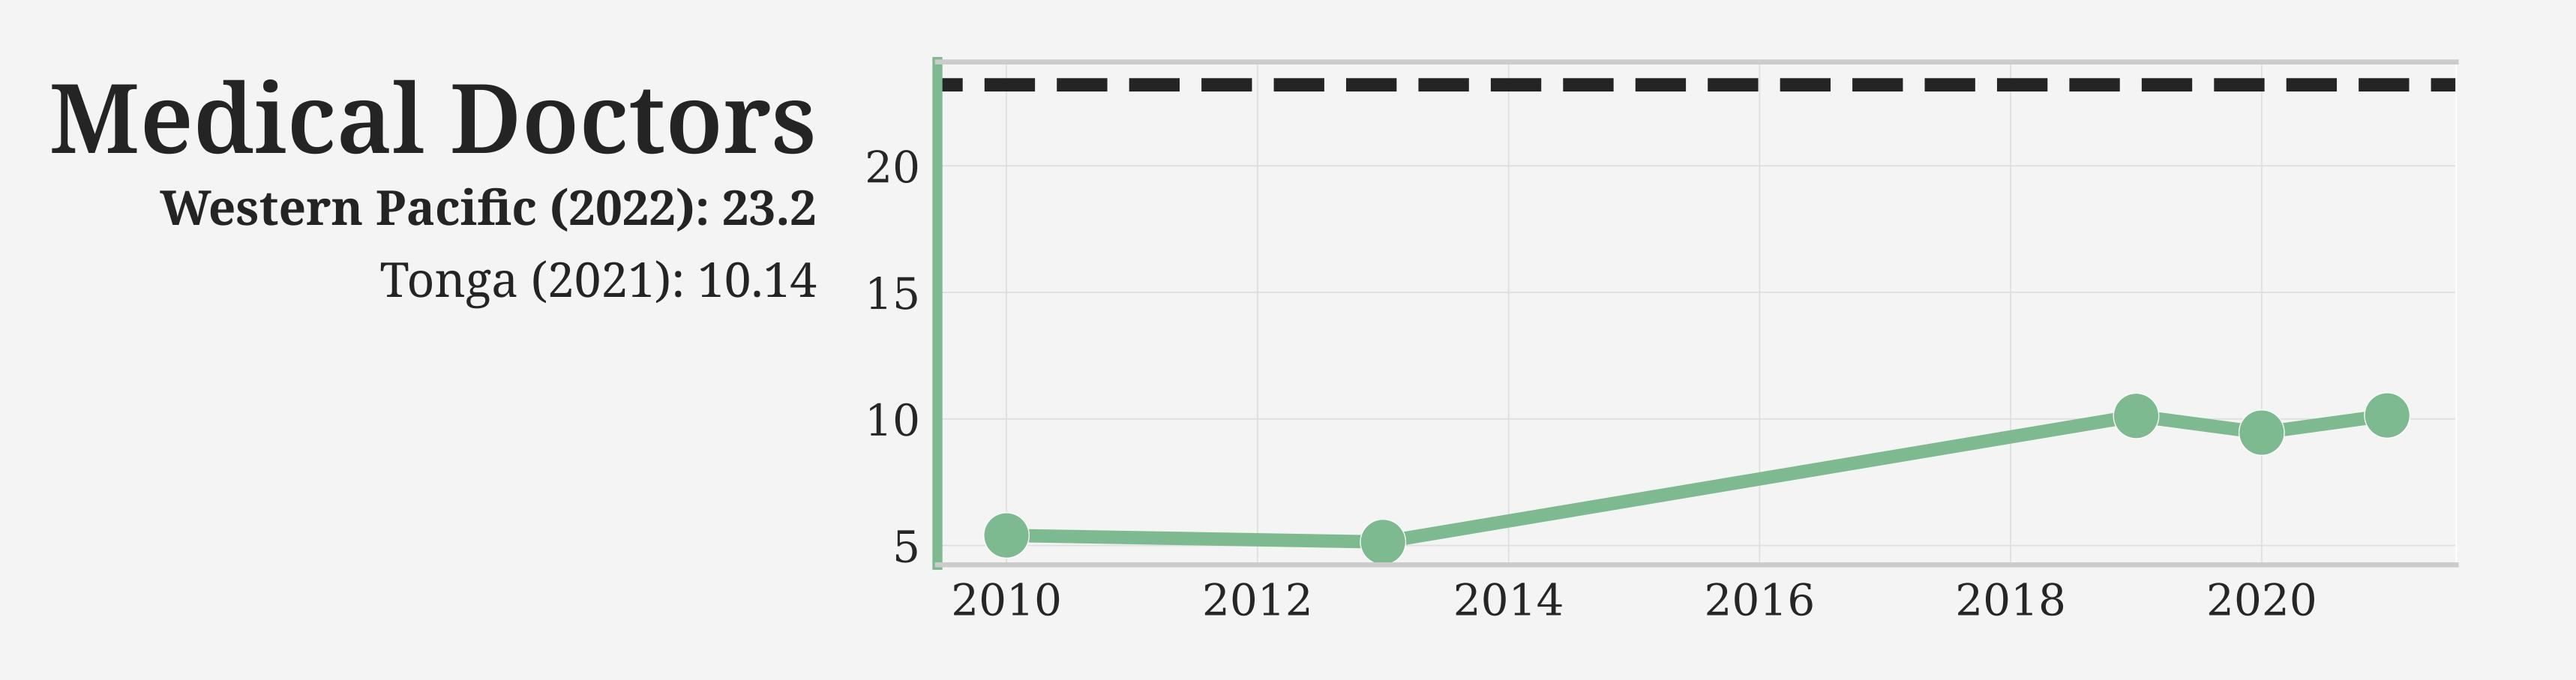

# 399 Nursing & Midwifery Professionals 144 Other Health Staff (Dentists included) 59 Medical Doctors 5 Pharmacists

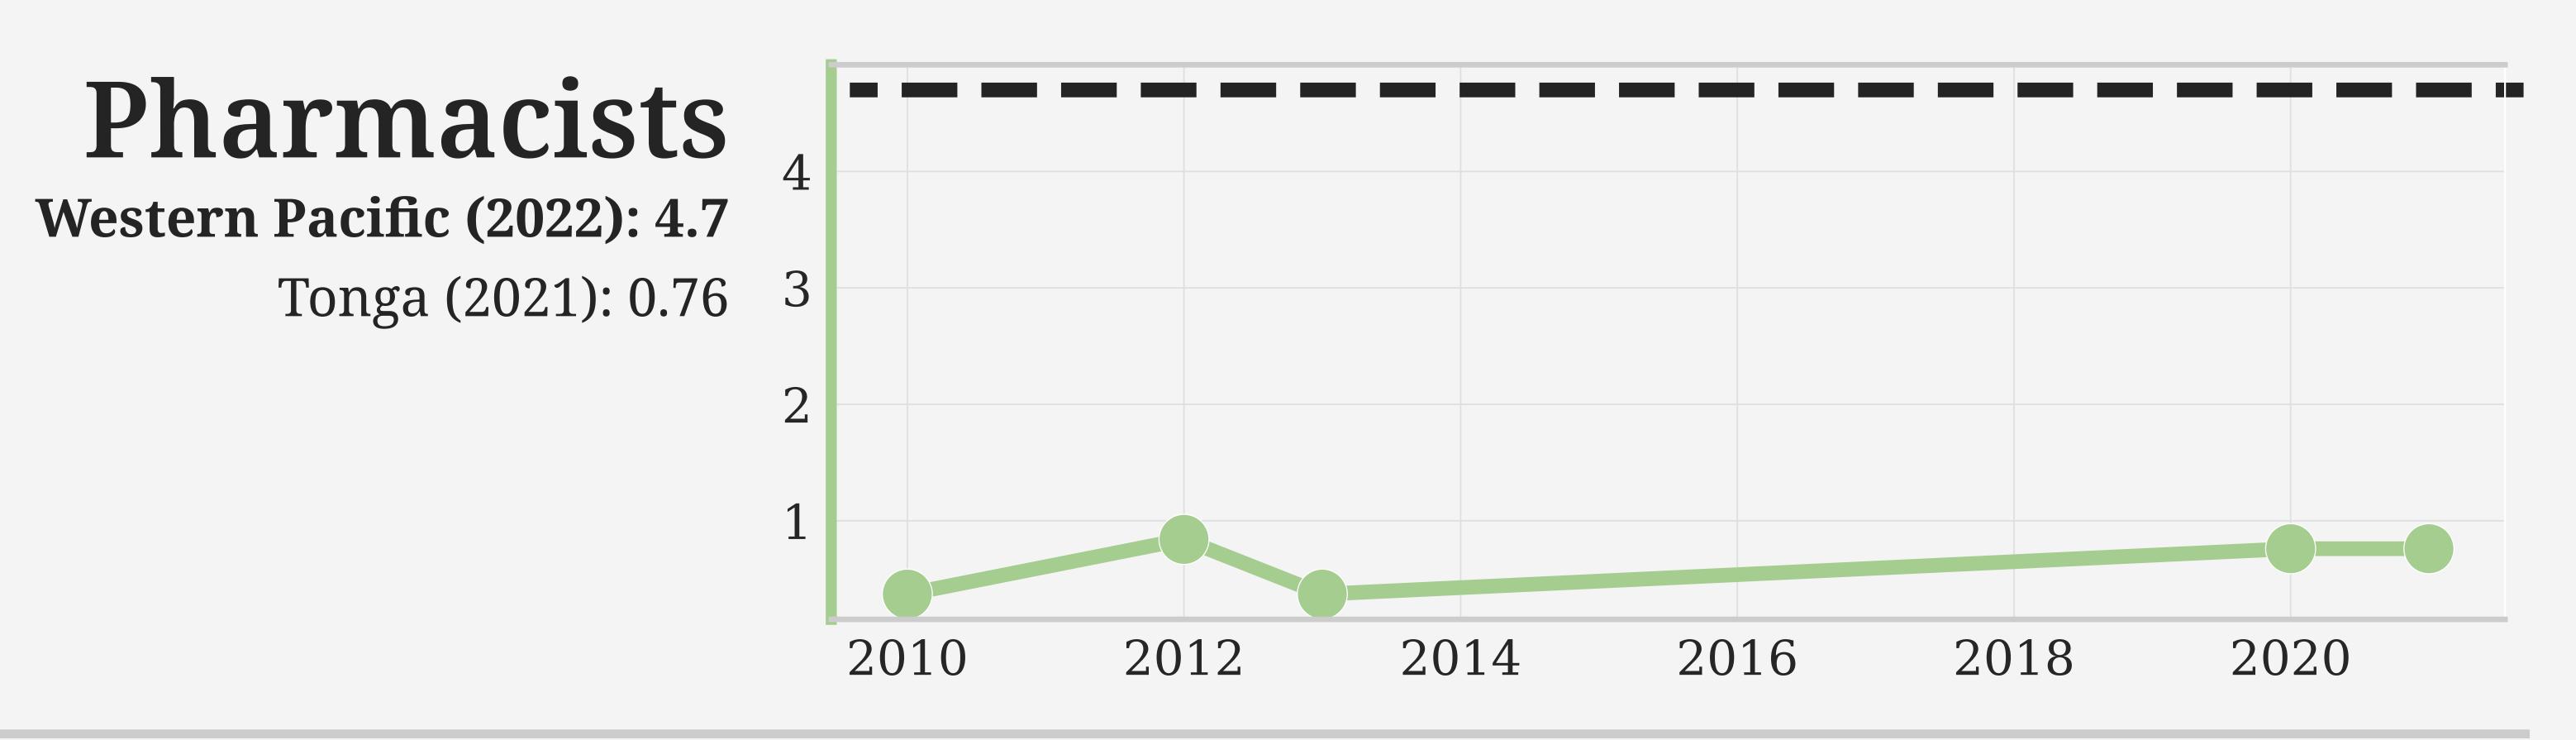

### Health Worker Density across Tonga

Unit is "per 10,000 population." Dashed line represents WHO density across the Western Pacific Tonga's density of Nursing and Midwifery Professionals is most comparable to the Western Pacific region, while all others are relatively far below. Recent years indicate slight growth within the past decade.
